

DHANUSH N

UI UX Designer | Product Designer | Bangalore, India | +91-99860-72700 | dhanush.n698@gmail.com

Portfolio: <https://dhanush-portfolio-tau.vercel.app>

PROFESSIONAL SUMMARY

Product Designer with 4+ years of experience owning end-to-end design for consumer-facing and B2B products across fintech, immigration, hospitality, and healthtech. Proven ability to translate complex user problems into simple, elegant flows — from research and wireframes through to high-fidelity prototypes and shipped products. Comfortable presenting design decisions to stakeholders, iterating on feedback fast, and collaborating across product, engineering, and content teams to raise the quality bar.

CORE SKILLS

Design: Product Design, UI/UX, User Research, Wireframing, Prototyping, Information Architecture, Interaction Design, Usability Testing, Responsive Design, Consumer App Design

Design Systems: Component Libraries, Design Tokens, Theming, Dark Mode, Accessibility (WCAG AA), Developer Handoff, Style Guides

Tools: Figma, Adobe XD, FigJam, Photoshop, Illustrator, Shopify, WordPress, Google Analytics 4, Lighthouse

Methods: Design Thinking, A/B Testing, Conversion Optimisation, User Research, Stakeholder Presentations, Agile, Scrum, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Product Designer (UI/UX) — XIPHIAS Group, Bangalore Aug 2022 – Present

- Owned design for 8+ live products across immigration, e-commerce, and real estate — research, wireframing, prototyping, and developer handoff.
- Rebuilt the flagship immigration platform solo in 3 months (25+ country pages, 30+ programme views) — contributing to ~30% organic traffic lift post-launch.
- Improved conversion on key consumer flows by replacing exit-intent popups with embedded forms, applying progressive disclosure, and adding contextual error states — driven by user behaviour data.
- Built a scalable design system with tokens, components, and theming across light and dark modes for multiple products.
- Collaborated with PMs, engineers, and content teams across the full product lifecycle — ensuring design quality and consistency at every stage.

Product Designer — ASTA Healthtech 2025 – 2026

- Designed the product website for a clinical AI patient monitoring platform, translating a complex AI workflow into clear, trust-building product storytelling for hospital buyers.

- Owned information architecture, visual system, and components for a regulated healthtech context — WCAG AA compliant, perfect Lighthouse scores at launch.

Product Designer — TUR Middle East FZC 2025 – 2026

- Designed the full B2B platform website — 6 product verticals, 7 regional offices, multi-catalogue pages, and a technical blog — for a GCC and South Asia institutional audience.
- Delivered a dual-theme responsive UI, maintaining brand consistency across a complex specification-led product range.

Product Designer — Resort Booking & Property Management 2023 – 2024

- Designed a full-stack admin suite for a boutique resort — front-desk, housekeeping, finance, and reporting modules across a dual-theme design system.
- Owned end-to-end UX for a 63-page, 46-data-model product solo — from information architecture and user flows through to high-fidelity components and developer handoff.

Product Designer — Harmony Luxe Spa Admin 2025 – 2026

- Designed a SaaS-style billing and operations dashboard — menu pricing, GST invoices, customer index, expense tracking, analytics, and print/PDF workflows.
- Owned end-to-end UX from information architecture and user flows through to high-fidelity components and developer handoff, solo.

SELECTED PROJECTS

XIPHIAS Immigration — Rebuilt a 15-year firm's platform solo in 3 months. 25+ countries, 30+ programmes, ~30% organic traffic lift post-launch.

Vault — Personal Finance App — End-to-end mobile app concept: research → wireframes → hi-fi system. Consumer fintech, live on portfolio.

Resort Booking & Property Management — Full product design for a boutique resort: booking engine, guest accounts, and admin suite. 63 pages, 46 data models, dual-theme system.

ASTA Healthtech — Product website for a clinical AI monitoring platform. Designed workflow narrative, component system, and UI. Perfect Lighthouse scores at launch.

XIPHIAS Superfoods — D2C brand and storefront designed and launched end-to-end in 15 days — brand identity, product pages, full purchase funnel.
